PROFILE

Motivated and detail-oriented **Computer Science undergraduate specializing in Data Science** with strong foundations in **data analysis, software engineering and machine learning** with hands-on experience in developing academic and personal projects. Passionate about transforming data into meaningful insights and building efficient, user-friendly solutions. Possess strong problem-solving, teamwork and communication skills with the ability to learn new technologies quickly. Seeking opportunities to apply technical knowledge, gain industry experience and further develop expertise in data-driven technologies and software solutions.

EDUCATION

University of Kelaniya, Sri Lanka

2023 – Present

Bachelor of Science (Hons) in Computer Science
Specialization in Data Science
Current GPA: **3.71**

G.C.E Advanced Level Examination

2021

Physical Science Stream
Z-Score: **1.571**

TECHNICAL SKILLS

Programming	Python, C, C#, Java, JavaScript, HTML, CSS
Frameworks	React JS, Next JS, Node JS, Flask, Spring Boot, Tailwind CSS, Bootstrap
Databases	MySQL, PostgreSQL, PL/SQL, Supabase
Tools & Platforms	GitHub, Power BI, Microsoft Excel, Docker, Azure
Core Concepts	Data Analysis, Data Visualization, Machine Learning, Object Oriented Programming, Data Structures

PROJECTS

Crypto & Forex Signal Generator 🔗

Python , Flask , React JS , Scikit-learn

- Developed an AI-powered trading signal generator for crypto and forex markets using technical analysis and machine learning.
- Implemented technical indicators such as RSI, EMA, and MACD to generate BUY / SELL / HOLD trading signals.
- Built machine learning prediction models using Random Forest with probability-based confidence scoring.
- Developed RESTful APIs using Flask to connect backend analytics with the React frontend.
- Integrated TradingView Lightweight Charts for real-time market visualization and interactive chart analysis.
- Utilized Binance API and Twelve Data API to fetch live market data for multiple trading pairs and timeframes.

Fake News Detection System 🔗

Python , Flask , React JS , NLP

- Developed an AI-powered fake news detection system using Machine Learning and Natural Language Processing techniques.
- Built a Logistic Regression model with TF-IDF vectorization to classify news articles as Fake or Real.
- Implemented NLP preprocessing techniques using NLTK for text cleaning and feature extraction.

- Developed RESTful APIs using Flask for model prediction and backend communication.
- Designed an interactive React frontend to display prediction results with probability-based confidence scores.
- Trained and evaluated the model using labeled datasets to improve prediction accuracy and reliability.

HallEase - Hall & Event Management System

Next JS , TypeScript , Supabase , Mailjet

- Developed a web-based hall and event management system for the Faculty of Computing and Technology, University of Kelaniya.
- Built the frontend using Next.js and TypeScript with a responsive and user-friendly interface.
- Integrated Supabase for authentication, database management, and role-based user access control.
- Implemented email notification functionality using Mailjet for booking and event updates.
- Contributed to AI-enhanced features using Google Gemini for smart system functionality.
- Collaborated within a team environment to design scalable modules and deliver efficient real-world solutions.

ZapVerse - Social Media Platform

Spring Boot , Thymeleaf , Azure , Supabase

- Developed a social media platform for university students to share text-based posts and interact through personalized content feeds.
- Built RESTful backend services using Spring Boot and designed dynamic server-side rendered interfaces with Thymeleaf.
- Integrated Supabase/PostgreSQL for secure user data management and scalable database operations.
- Implemented features including post sharing, real-time interactions, and personalized feed functionality.
- Utilized Maven for project management and deployed the application using Azure with GitHub CI/CD integration.

CERTIFICATIONS

- Generative AI for Data Analysts - IBM Coursera 
- Python for Data Science, AI & Development - IBM Coursera 
- Power BI and Power Virtual Agents - Microsoft Coursera 
- Google Analytics - Google Skillshop 
- AWS AI Practitioner Challenge - Udacity 
- IBM Cloud Essentials - IBM 
- Linux Essentials - Cisco 

LEADERSHIP & ORGANIZATIONS

- | | |
|--|----------------|
| • Computer Science Student Association - Member | 2023 – Present |
| • IdeaForge Organizing Committee - Vice President, Marketing | 2023 – 2024 |
| • FOSS Community - Member | 2023 – Present |
| • Rotaract Club - Influncia Organizing Committee - PR Coordinator | 2024 – 2025 |
| • ISACA-UOK - Member | 2023 – Present |

SOFT SKILLS

- | | | |
|----------------------|------------------------|----------------|
| • Problem Solving | • Critical Thinking | • Leadership |
| • Team Collaboration | • Communication Skills | • Adaptability |

LANGUAGES

Sinhala (Native) **English** (Professional) **Japanese** (Basic)
